REASONS TO OWN

- Diversified mix of fixed income securities and Canadian, US, and International equities in one Fund
- Active portfolio rebalancing
- Long term, value management
- You are comfortable with low to medium investment risk

FUND OBJECTIVE

To provide investors with a relatively stable, superior long-term rate of return, through a balanced portfolio of common shares and fixed income securities.

INVESTMENT STYLE

We manage the investment mix between fixed income and equity securities as opportunities arise, but a portion of the Fund will be maintained in each asset class. Generally, the Fund's holdings in equity securities will range between 45% and 65% of its total investments, with the remaining assets in fixed income securities. Not more than 35% of the Fund's investments will consist of foreign equity securities.

Within the equity component, we utilize a value approach to stock selection, applying bottom-up, fundamental analysis to all investment decisions. Our investment goal is to protect our client's capital while offering superior investment growth, regardless of economic conditions. We seek to invest in companies with stable earnings with a long term business model and management team that we have a high level of comfort in.

The fixed income securities are chosen to provide safety of capital and liquidity. We use a relative valuation approach and will hold investment grade corporate bonds, preferred shares, and other fixed income securities in the fixed income component of the Balanced Fund.
