

Leith Wheeler Canadian Dividend Fund Series F

Summary of Investment Portfolio as of August 31, 2017

Fund Objective:

To provide investors with a source of monthly income, with some potential for long term growth through capital appreciation and growth in dividends.

Investment Style:

We utilize a value approach to stock selection, applying bottom-up, fundamental analysis to all investment decisions. Our investment goal is to protect our clients' capital while offering superior investment growth, regardless of economic conditions. We seek to invest in companies with stable earnings with a long term business model and management team that we have a high level of comfort in. We focus on finding companies with a proven track record of paying and increasing their dividend over time.

As value investors, we tend to include companies in the portfolio when they are viewed as "out of favour" by the market and have declined in price. Companies can become undervalued when there is a lack of investor awareness, when an entire industry is out of favour with investors, or when a company experiences a short-term difficulty which, following careful analysis, we believe can be overcome. By purchasing these companies after a price decline, we find we are able to control risk in the portfolio as these investments often have less downside risk while offering a decent potential return.

Financials	43.8%
Information Technology	4.9%
Utilities	8.8%
Real Estate	7.5%
Cash & Cash Equivalents [†]	1.4%

Monthly Commentary:

The Leith Wheeler Canadian Dividend Fund increased by 1.5% in August, after fees and expenses, versus the S&P/TSX Composite index, which was up 0.7%. The outperformance was mostly due to stock selection, with sector allocation being slightly positive. There were no new holdings or deletions from the Fund in August.

Positive stock selection and an overweight in the Industrials sector were the top contributors to performance this month. **Toromont** announced that it was purchasing the Hewitt Group of Companies. Hewitt is the Caterpillar dealer in Quebec, Western Labrador and the Maritimes. We believe this is a great acquisition for Toromont shareholders, once the deal closes the company will have a geographic footprint that starts in Manitoba and ends in Newfoundland. In addition to the cost synergies, the growth opportunities are also attractive. **Finning** announced solid Q2 results, revenues were up 21% to \$1.6 billion boosted by new equipment sales and product support revenues. The backlog rose 30% to \$900 million with increases in each of Finning’s geographic regions.

Stock selection and an overweight in the Utilities sector were the next strongest contributors to performance, led by **Brookfield Infrastructure Partners**. The company experienced strong Funds from Operations (FFO) growth, up 28% year over year, driven by NTS’ initial contribution and solid overall organic growth, with a slight offset on FX and corporate costs.

Having no exposure to the Materials sector was the primary detractor from performance, as the sector was up 5.5% over the month.

[†] Cash and cash equivalents includes other assets and liabilities

Leith Wheeler Investment Counsel Ltd. is the manager and primary investment advisor for the Leith Wheeler Mutual Funds. Leith Wheeler Investment Funds Ltd. is the principal distributor of the Leith Wheeler Mutual Funds. Leith Wheeler Mutual Funds are also distributed through authorized dealers. Commissions, trailing commissions, management fees and expenses all may be associated with mutual fund investments. Please read the prospectus before investing.

The indicated rates of return are the historical annual compounded total returns including changes in unit value and reinvestment of all distributions and does not take into account sales, redemption, distribution or optional charges or income taxes payable by any securityholder that would have reduced returns. Mutual funds are not guaranteed or covered by the Canada Deposit Insurance Corporation, Leith Wheeler, or any other deposit insurer. Fund values change frequently and past performances may not be repeated. Just as performance can move up and down, so too can distributions; distribution history should not be used to predict future distributions. The summary of the investment fund’s portfolio may change due to ongoing portfolio transactions.
