## REASONS TO OWN

- Source of income with some potential for capital gains
- Actively managed portfolio of U.S. senior loans, global high yield and global investment grade fixed income
- Tactical allocation based on relative value across assets and economic cycle assessment
- Duration management via floating rate and non-floating rate product to mitigate interest rate volatility  
Low to medium investment risk

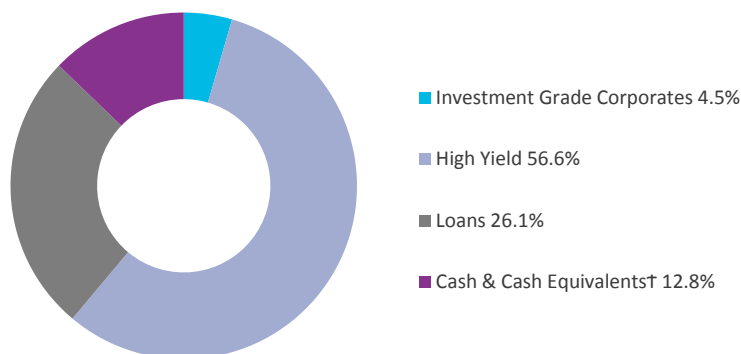

## FUND OBJECTIVE

To achieve interest income, with the potential for some long term capital growth, by investment primarily in corporate credit securities. The primary return objective is to deliver income and return in excess of CDOR over a credit cycle.

## INVESTMENT STYLE

We aim to add value in the Multi Credit Fund by generating yield using a relative valuation approach and investing in U.S. senior loans, global high yield and global investment grade fixed income. We find opportunities both across different asset classes and within the capital structure, based on relative value and where we are in the economic cycle. There is a focus on managing credit and duration risk, as access to both floating rate and non-floating rate investments moderates interest rate volatility. Safety and liquidity are the focus of our approach to fixed income investing.
